THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. **PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE** OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: Mail **Mail Stop ISSUE FEE**
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450
or Fax **(571)-273-2885**

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 685 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 685 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David M. Mello on 7/31/2008.

The application has been amended as follows:

Please cancel claims 10-11 and 16-20.

Please replace claim 1 with the following claim:

1. (currently amended) A catheter for insertion into a biological conduit comprising: an elongate catheter shaft having a proximal end and a distal end for insertion into the biological conduit, the catheter shaft comprising:
a material collection chamber located within the catheter shaft,
a controllably arcuate segment adjacent to the distal end configured to selectively transition between a relatively straight shape and a bowed shape, the controllably arcuate segment defining an opening in the form of a hole that is located at a convex portion of the controllably arcuate segment when the arcuate segment takes the bowed shape, wherein a portion of the controllably arcuate segment having the opening is configured to maintain a substantially constant cross section throughout the transition; and a sliding member movably disposed within the shaft and configured to selectively traverse the opening to move an occlusive material received through the opening into

the material collection chamber and away from said opening, wherein movement of the sliding member past the arcuate segment and to the distal end allows for the transition from the relatively straight shape to the bowed shape.

Please replace claim 15 with the following claim:

15. (currently amended) A catheter for insertion into a biological conduit comprising: an elongate catheter shaft having a proximal end and a distal end for insertion into the biological conduit, the catheter shaft comprising:
a controllably arcuate segment adjacent to the distal end configured to selectively transition between a relatively straight shape and a bowed shape, the arcuate segment defining an opening in the form of a hole that is located at a convex portion of the arcuate segment when the arcuate segment takes the bowed shape, wherein the hole is configured to receive an occlusive material when the arcuate segment takes the bowed shape and a portion of the arcuate segment having the opening is configured to maintain a substantially constant cross section throughout the transition;
an aspiration chamber located near the shaft proximal end, the aspiration chamber having an aspiration port configured to receive a vacuum input;
an aspiration lumen configured to form a vacuum path between the aspiration chamber and the opening when the vacuum input is applied to the aspiration port;
and a sliding member movably disposed within the shaft and configured to selectively traverse the opening to move the occlusive material received through the opening away from said opening and toward the aspiration chamber, wherein movement of the sliding

Art Unit: 3763

member past the arcuate segment and to the distal end allows for the transition from the relatively straight shape to the bowed shape.

Please add claim 21:

21. (New) A catheter for insertion into a biological conduit comprising:

an elongate catheter shaft having a proximal end and a distal end and a longitudinal axis extending between the proximal and distal end, the catheter shaft comprising:

a material collection chamber located within the catheter shaft,

a controllably arcuate segment configured to selectively transition between a relatively straight shape and a bowed shape, the controllably arcuate segment defining an

opening in the form of a hole that is located at a convex portion of the controllably arcuate segment when the arcuate segment takes the bowed shape, wherein a portion of the controllably arcuate segment having the opening is configured to maintain a substantially constant cross section throughout the transition,

substantially straight portions on both sides of the arcuate segment, wherein the straight portions are substantially co-axial with the longitudinal axis while the arcuate segment is in the bowed shape;

and a sliding member movably disposed within the shaft and configured to selectively traverse the opening to move an occlusive material received through the opening into the material collection chamber and away from said opening.

The following is an examiner's statement of reasons for allowance: The prior art made of record does not disclose or render obvious a catheter for insertion into a biological conduit comprising the limitations recited in claims 1, 15, and 21. The closest prior art, namely Roll (5,419,764), does not disclose or render obvious a catheter including a sliding member that moves in the distal direction past the arcuate segment to allow for transition to bowed shape as is now recited in claims 1 and 15. Roll only discloses a stiffening cannula that straightens the catheter and is moved proximally away from the distal end to allow the catheter to be bent by tension wires. The stiffening cannula is incapable of being moved distally past the arcuate segment to the distal end to allow transition from the straight to the bowed shape. Roll also does not disclose substantially straight portions on both sides of the arcuate segment that share the same axis as the longitudinal axis of the catheter. The distal end of the Roll catheter is bent in a direction out of the axis and therefore cannot share the same axis as the catheter shaft.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to THEODORE J. STIGELL whose telephone number is (571)272-8759. The examiner can normally be reached on M-F 8:30-5:00.
